

Sternreiter

clocks from Berea, Ohio

This American office clock is a timepiece that will immediately harken the romance of yesteryear. Traditional, beautiful, practical. Sternreiter uses the finest quality materials and practices. This clock has an eight-day, Westminster chime, German movement with a clear day, date, and month readout. The Ithaca is also available in a country oak finish.

SW 808 786 08 Ithaca

13" x 27" x 5"

- German-made case and movement, reproduction of a Nineteenth Century, double-dial American calendar clock
- Eight-day movement with Westminster chime on rods
- Second multi-function dial shows day, date, and month
- Hinged brass and glass bezels
- Solid hardwoods with deep, American cherry finish, medium gloss
- Also available with American-oak finish, medium gloss (SW 808 786 04)

Also pictured on page 15 of our 2003-2004 white North Coast Imports catalog.

This timepiece has a classic design that has been around for generations. The German Box Clock style was avidly produced since Gustav-Becker introduced it in the early part of the Twentieth Century. This piece by Sternreiter is the finest (and to our knowledge the only) example available in America today.

The glass is beveled and leaded in a simple Bauhaus, or Shaker design. The solid-brass trim has an elegant brushed finish. The case is made of thick and solid hardwood boards and has a medium-gloss walnut finish.

Most importantly, this clock sounds the Westminster melody and strike on long chime rods. These are not the short chime rods found on most spring-wound clocks in this price range. Instead, this piece has a deep and rich sound similar to that of a Grandfather Clock.

SW 818 160 03 Bauhaus

11" x 23" x 7"

- NEW! French-walnut finish, semi-gloss
- Mechanical wall, Westminster chime on LONG CHIME RODS
- Eight-day
- All solid-wood case

Also pictured on page 17 of our 2003-2004 white North Coast Imports catalog.

This traditional wall clock has two versions of display. The top bonnet is removable so that the owner can display it according to his or her moods or decor. Without the top gives the clock a strong and stately look with its square top. With the top attached provides a more elegantly finished look. The clock is available in a medium-gloss, French-walnut finish (pictured) or a medium-gloss antique oak finish.

SW 808 793 03 Handel

11" x 23" x 7"

- German-made case and movement
- Eight-day movement with Westminster chime on rods
- Removable bonnet
- Three pieces of crystal glass
- Solid hardwoods with deep, French-walnut finish
- Also available with antique-oak finish, medium gloss (SW 808 793 04)

This traditional wall clock is our least-expensive mechanical wall clock. It's elegant appeal fits in any traditional decor, be it European or American.

SW 808 630 07 Emily

12" x 21" x 6"

- German-made case and movement
- Eight-day movement with Westminster chime on rods
- Solid hardwoods with deep mahogany finish

Also pictured on page 16 of our 2003-2004 white North Coast Imports catalog.

These castle clocks are modern versions of the medieval "Waaguhr." In 1640 The wagon-the-wall clock was the first mechanical clocks that was affordable by the new middle class in Europe. Its simple design allowed for only one hand indicating hours. The average person of the Seventeenth-Century had previously measured time with only three times of day: sunrise, high noon, and sunset. These clocks are great conversation pieces, great gifts, and are the least expensive mechanical clocks available.

WW 801 677 00 (left) and WW801 504 00 (right, with cast brass dial)

6" x 9" x 4"

- German-made case and movement
- Eight-day, weight driven movement
- Modern clocks have solid-brass mechanism and two hands for hours and minutes
- Drop-off hourly bell strike

Also pictured on page 10 of our 2003-2004 white North Coast Imports catalog.

MM 808 146 08 Lincoln

14" x 10" x 5"

- Mechanical tambour
- German-made, 8-day, Westminster movement
- Chime on rods
- Brass and crystal-glass bezel, hinged doors in front and back
- Solid wood case with American cherry finish

Sternreiter clocks use the finest casemakers and movement makers from around the world to create timepieces which delight and inspire American collectors and enthusiasts. Most of these clocks are designed, assembled and controlled for quality in our shop in Berea, Ohio. Our family business comprises over 50 years of experience and love for fine clocks and timepieces.

Please take your time to peruse this brochure as well as other publications from North Coast Imports and we're sure you will find something suitable for every taste and budget. If you have any questions for us give us a call or write us an email. Whether you are purchasing a clock for the first time, or if you are a seasoned collector, we always enjoy talking to people who share our love and interest for fine timepieces.

- Brass and crystal-glass bezel, hinged doors in front and back
- Solid wood case with medium oak finish (pictured), also available with American cherry finish (QM 028 119 08)

Elias Ingraham (1805-85), a cabinet maker, was commissioned by George Mitchell to design and build a new style of clock case. Ingraham came to work for Mitchell in May of 1828 and eventually designed the sharp gothic clock case in about 1845. This "steeple clock" style has ever since been one of the most popular designs in American cabinetry. It has been copied and redesigned countless times over the last two centuries.

The *New Haven* steeple clock from Sternreiter is named for the town in Connecticut which holds some of America's most beautiful examples of gothic architecture. Available with either mechanical or quartz Westminster chimes, the *New Haven* features a reverse-painted glass which harken the beauty and complexity of a gothic cathedral's rose window.
